NAVEEN BANOTH

Senior Python Backend Developer | Fast API | Django | Microservices | AWS
Phone: 6309069639 **Email:** banothnaveenbsc@gmail.com

PROFESSIONAL SUMMARY

Senior Python Backend Developer with 5+ years of experience designing scalable, high-performance backend systems for e-commerce and healthcare platforms. Strong expertise in Fast API, Django REST Framework, Flask, microservices architecture, and AWS cloud deployment. Proven track record of optimizing APIs, improving system performance, and building secure, production-grade applications. Passionate about clean architecture, system design, and building reliable distributed systems.

PROFESSIONAL EXPERIENCE

Senior Software Engineer
Scubel Soft Services
2021 JAN – Present

Roles & Responsibilities

Leading backend development initiatives across healthcare and enterprise e-commerce platforms, responsible for designing scalable microservices, architecting high-performance RESTful APIs, and ensuring secure, production-grade deployments. Collaborating closely with cross-functional teams including frontend, DevOps, and product stakeholders to deliver reliable features aligned with business requirements. Driving database optimization, performance tuning, and system reliability improvements while maintaining code quality through peer reviews and best engineering practices. Mentoring junior developers and contributing to architectural decisions, CI/CD enhancements, and cloud infrastructure management.

TECHNICAL SKILLS

- **Programming Languages:** Python, JavaScript (ES6+), HTML5, CSS3
- **Web Frameworks:** Django, Fast API, Flask
- **Databases:** SQL, MySQL, MongoDB, PostgreSQL
- **ORM:** Django ORM, SQL Alchemy
- **API Development:** RESTful APIs, GraphQL
- **Version Control:** Git, GitHub
- **Tools/IDE:** PyCharm, VS Code, Postman
- **Cloud & DevOps: GCP,** Jenkins, Docker, Linux, CI/CD Pipelines

---

***Project #2*: Argos UK – Enterprise E-Commerce Platform**

- Large-scale multi-category e-commerce platform serving furniture, fashion, electronics, and grocery domains.
- Designed and developed scalable REST APIs using Fast API and Django REST Framework
- Architected microservices for cart, checkout, and order management improving modularity and deployment efficiency
- Optimized PostgreSQL queries, indexing, and query plans reducing database latency by 35%
- Implemented Redis caching strategy decreasing API response time by 40%
- Built asynchronous background job processing using Celery for order notifications and payment workflows
- Integrated secure payment gateways with encryption and tokenization ensuring PCI compliance
- Implemented JWT-based authentication and Role-Based Access Control (RBAC) for secure access management
- Containerized applications using Docker and deployed on AWS EC2 with Nginx reverse proxy
- Designed CI/CD pipelines reducing deployment time by 50%
- Improved overall API throughput and reduced system downtime through proactive performance tuning

---

***Project #1 :* Royal Brisbane & Women's Hospital – Healthcare Management System**

- Healthcare platform managing patient records, appointment scheduling, and secure medical data access.
- Developed secure RESTful APIs for patient records and appointment scheduling
- Designed normalized and scalable database schema in PostgreSQL for high-volume healthcare datasets
- Engineered RBAC authorization system ensuring secure multi-role access control
- Implemented audit logging system for regulatory compliance and activity tracking
- Integrated AWS S3 for secure medical file storage with encryption and access policies
- Optimized scheduling engine improving appointment allocation efficiency by 30%
- Strengthened data security practices aligning with healthcare compliance standards
- Enhanced backend reliability and reduced production issues through structured logging and monitoring

---

EDUCATION

BSC - Computer Science
Siddhartha Degree College , Narsampet 2018-2021
